PLANT AND SOIL

Contents Volumes 155 &156, October 1993

Selected papers from the

PROCEEDINGS OF THE TWELFTH INTERNATIONAL PLANT NUTRITION COLLOQUIUM

21–26 September 1993, Perth, WA, Australia

Guest Editor: N.J. Barrow

The rhizosphere and plant nutrition: A quantitative approach 1
P.R. Darrah

Molecular biological approaches to plant nutrition 21
D.T. Clarkson, M.J. Hawkesford

Recent developments in electron microscopical techniques for studying ion localization in plant cells 33
R. Stelzer, H. Lehmann

Nuclear magnetic resonance studies of the location and function of plant nutrients in vivo 45
R.B. Lee, R.G. Ratcliffe

Modelling nutrient responses in the field 57
J.F. Angus, J.W. Bowden, B.A. Keating

Non-destructive methods for demonstrating chemical changes in the rhizosphere, I: Description of methods 67
B. Dinkelaker, G. Hahn, V. Römheld, G.A. Wolf, H. Marschner

Non-destructive methods for demonstrating chemical changes in the rhizosphere, II: Application of methods 71
B. Dinkelaker, G. Hahn, V. Römheld, G.A. Wolf, H. Marschner

Dissolution of ferric phosphate by alfalfa (*Medicago sativa* L.) root exudates 75
Y. Masaoka, M. Kojima, S. Sugihara, T. Yoshihara, M. Koshino, A. Ichihara

Mucilage secretion and its interaction with soil, and contact reduction 79
N.C. Uren

The chemistry of the lowland rice rhizosphere 83
G.J.D. Kirk, C.B.M Begg, J.L. Solivas

Influx and efflux of amino acids from *Zea mays* L. roots and their implications for N nutrition and the rhizosphere 87
D.L. Jones, P.R. Darrah

Mobilization of different phosphate fractions in the rhizosphere 91
A. Jungk, B. Seeling, J. Gerke

Secretion of acid phosphatase by the roots of crop plants under phosphorus-deficient conditions and some properties of the enzyme secreted by lupin roots 95
T. Tadano, K. Ozawa, H. Sakai, M. Osaki, H. Matsui

Mechanism of sugar retention by root of intact maize and field beans plants 99
K.H. Mühling, S. Schubert, K. Mengel

Biosynthetic pathway of phytosiderophores in iron-deficient graminaceous plants: A new assay system for the detection of nicotianamine amino-transferase activity 103
K. Kanazawa, S. Mihashi, N.K. Nishizawa, M. Chino, S. Mori

Influence of minerals on cytoplasmic streaming in root hairs of intact wheat seedlings *(Triticum aestivum* L.) 107
B. Sattelmacher, I. Heinecke, K.H. Mühling

Mobilisation of iron and manganese by plant-borne and synthetic metal chelatcrs 111
F.S. Zhang

Towards an understanding of the molecular basis of plant K^+ transport: Characterization of cloned K^+ transport cDNAs 115
L.V. Kochian, D.F. Garvin, J.E. Shaff, T.C. Chilcott, W.J. Lucas

Plasma membrane Ca^{2+} channels in roots of higher plants and their role in aluminium toxicity 119
M. Piñeros, M. Tester

Reduction of Fe(III), Mn(III), and Cu(II) chelates by roots of pea (*Pisum sativum* L.) or soybean (*Glycine max*) 123
W.A. Norvell, R.M. Welch, M.L. Adams, L.V. Kochian

Effect of zinc nutritional status on activities of superoxide radical and hydrogen peroxide scavenging enzymes in bean leaves 127
I. Cakmak, H. Marschner

Screening Arabidopsis for mutants in mineral nutrition 131
E. Delhaize, P.J. Randall, P.A. Wallace, A. Pinkerton

Expression of a gene (*Ids2*) induced by Fe deficiency treatment in the roots of *Hordeum vulgare* L. 135
S. Mori, N. Okumura, H. Nakanishi, Y. Umehara, M. Chino, N.K. Nishizawa

Approaches to cloning genes encoding for nutrient transporters in plants 139
F.W. Smith, M.J. Hawkesford, I.M. Prosser, D.T. Clarkson

Investigations of boron uptake at the cellular level 143
M. Jenkin, H. Hu, P. Brown, R. Graham, R. Lance, D. Sparrow

Boron uptake in sunflower, squash and cultured tobacco cells: Studies with stable isotope and ICP-MS 147
P. Brown, H. Hu

Uptake and distribution of calcium in rose plantlets as affected by calcium and boron concentration in culture solution 151
R. Ganmore-Neumann, S. Davidov

The contribution of different regions of the seminal roots of wheat to uptake of nitrate from soil 155
D.J. Brady, P.J. Gregory, I.R.P. Fillery

Regulation of nitrate uptake by amino acids in maize cell suspension culture and intact roots 159
P.E. Padgett, R.T. Leonard

Simulation of the maximum nitrate inflow (Imax) of lettuce (*Lactuca sativa* L.) grown under fluctuating climatic conditions in the greenhouse 163
B. Steingrobe, M.K. Schenk

Relationship between intracellular pH and N metabolism in maize (*Zea mays* L.) roots 167
J. Gerendás, R.G. Ratcliffe, B. Sattelmacher

Changes in the amino acid composition and protein modification in phloem sap of rice 171
H. Hayashi, S. Nakamura, Y. Ishiwatari, S. Mori, M. Chino

Nutrient storage pool concentrations in plants as diagnostic indicators of nutrient sufficiency 175
P.B. Barraclough

Postanthesis remobilisation and losses of nitrogen in wheat in relation to applied nitrogen 179
J.A. Palta, I.R.P. Fillery

Allocation of carbon and nitrogen as a function of the internal nitrogen status of a plant: Modelling allocation under non-steady-state situations 183
A. Van der Werf, T. Enserink, B. Smit, R. Booij

Growth and biomass partitioning of *Anthriscus sylvestris* (L.) Hoffm. and *Festuca ovina* (L.) at different relative addition rates of nitrogen 187
M.L. Hansson, A. Göransson

The role of free sugars and amino acids in the regulation of biomass partitioning and plant growth 191
J. Buysse, E. Smolders, R. Merckx

Nitrogen supply and the control of expansive growth and function in leaves and roots 195
A.J.S. McDonald, I. Stadenberg

Nitrogen redistribution to sorghum grains as affected by plant competition 199
C.A. Rosolem, S.M. Kato, J.R. Machado, S.J. Bicudo

Carbon-nitrogen interaction model in field crop production 203
M. Osaki

Comparison of production efficiency among field crops related to nitrogen nutrition and application 207
T. Shinano, M. Osaki, T. Tadano

Glutelin accumulation and changes in the levels of its mRNA in the superior and inferior spikelets of rice ear during ripening 211
Y. Iwasaki, T. Mae, C. Fukazawa, A. Makino, K. Ohira, K. Ojima

Improving the mineral reserves and protein quality of maize (*Zea mays* L.) kernels using unique genes 215
R.M. Welch, M.E. Smith, D.R. Van Campen, S.C. Schaefer

Critical plant K concentrations for growth and problems in the diagnosis of nutrient deficiencies by plant analysis 219
P.B. Barraclough, R.A. Leigh

Use of cation/anion exchange membranes for multi-element testing of acidic soils 223
M.J. McLaughlin, P.A. Lancaster, P.W.G. Sale, N.C. Uren, K.I. Peverill

The nutrition of grazed pastures in New Zealand 227
I.S. Cornforth, A.G. Sinclair, J.S. Rowarth

Nitrogen and phosphorus requirements of cotton and wheat under changing atmospheric CO_2 concentrations 231
G.S. Rogers, L. Payne, P. Milham, J. Conroy

Fluorescence and reflectance characteristics of manganese deficient soybean leaves: Effects of leaf age and choice of leaflet 235
M.L. Adams, W.A. Norvell, J.H. Peverly, W.D. Philpot

Release characteristics of ion-exchange resins as buffers in low ionic strength nutrient solutions 239
G.L. Kerven, C.J. Asher, L. Dethlefs

Non-structural carbohydrate: Analysis by near infrared reflectance spectroscopy and its importance as an indicator of plant growth 243
G.D. Batten, A.B. Blakeney, V.B. McGrath, S. Ciavarella

Understanding zinc reactions in vertisols to predict zinc responses by wheat 247
Y.P. Dang, R.C. Dalal, D.G. Edwards, K.G. Tiller

Use of GEOCHEM-PC to predict rare earth element (REE) species in nutrient solutions 251
E. Diatloff, C.J. Asher, F.W. Smith

Symptoms of mineral nutrient deficiencies and the nutrient concentration ranges in seedlings of *Eucalyptus maculata* Hook. 255
B. Dell, J.M. Robinson

Mineral nutrient disorders of root crops of the Pacific: Preliminary observations on sweet potato (*Ipomoea batatas*) 263
J.N. O'Sullivan, C.J. Asher, F.P.C. Blamey, D.G. Edwards

Why are hairy root clusters so abundant in the most nutrient-impoverished soils of Australia? 269
B.B. Lamont

Mineral uptake and transport in xylem and phloem of the proteaceous tree, *Banksia prionotes* 273
J.S. Pate, W.D. Jeschke

Phosphorus allocation in P-efficient and inefficient barley cultivars as affected by mycorrhizal infection 277
J.B. Baon, S.E. Smith, A.M. Alston

Root characteristics of native plant species in relation to the benefit of mycorrhizal colonization for phosphorus uptake 281
D.A. Jasper, J. Davy

Effects of seed phosphorus concentration on the emergence and growth of subterranean clover (*Trifolium subterraneum*) 285
C.J. Thomson, T.P. Bolger

Defining phosphorus efficiency in plants 289
C.J.P. Gourley, D.L. Allan, M.P. Russelle

Genotypic differences in phosphorus efficiency of wheat 293
W.J. Horst, M. Abdou, F. Wiesler

Sowing date and phosphorus utilization by wheat 297
G.D. Batten, N.A. Fettell, J.A. Mead, M.A. Khan

The mobility of boron in plants 301
J.J. Oertli

The control of boron accumulation by two genotypes of wheat 305
T.P. Garnett, M.A. Tester, R.O. Nable

Grain set failure in boron deficient wheat 309
B. Rerkasem, R. Netsangtip, S. Lordkaew, C. Cheng

Effects of boron on pollen viability in wheat 313
C. Cheng, B. Rerkasem

An effect of shade on the boron requirement for leaf blade elongation in black gram *(Vigna mungo* L. Hepper) 317
R.N. Noppakoonwong, R.W. Bell, B. Dell, J.F. Loneragan

Responses of rape genotypes to boron application 321
Y. Yuai, X. Jianming, Y. Zhengqiang, W. Ke

The use of a double isotope (^{15}N and ^{34}S) labelling technique to assess the suitability of various reference crops for estimating nitrogen fixation in *Gliricidia sepium* and *Leucaena leucocephala* 325
K.O. Awonaike, S.K.A. Danso, F. Zapata

$^{15}N_2$ measurement of nitrogen fixation by legumes and actinorhizals: Theory and practice 329
M. Wood, A.M. McNeill

Differences between *Bradyrhizobium* strains NC92 and TAL 1000 in their nodulation and nitrogen fixation with peanut in iron deficient soil 333
G.W. O'Hara, A. Hartzook, R.W. Bell, J.F. Loneragan

***Bradyrhizobium* technology: A promising substitute for chemical nitrogen fertilizer in Bangladesh agriculture** 337
M.S. Hoque

Spatial distribution of root activity and nitrogen fixation in sorghum/pigeonpea intercropping on an Indian Alfisol 341
O. Ito, R. Matsunaga, S. Tobita, T.P. Rao, Y.G. Devi

Effects of low molybdenum seed on nodule initiation, development and N_2 fixation in black gram (*Vigna mungo* L.) 345
S. Jongruaysup, G.W. O'Hara, B. Dell, R.W. Bell

The role of copper in nitrogen fixation in *Lupinus luteus* L. 349
H. Seliga

Distribution of fixed-N and nitrate-N in cowpea during pod development 353
L.A. Douglas, R.W. Weaver

Pod development of groundnut (*Arachis hypogaea* L.) in solution culture 355
G.E. Zharare, C.J. Asher, F.P.C. Blamey, P.J. Dart

Nitrogen use efficiency of rice reconsidered: What are the key constraints? 359
K.G. Cassman, M.J. Kropff, J. Gaunt, S. Peng

Synchronising diagnosis and correction of nitrogen deficiency in barley grown in semi-arid environments 363
D.E. Elliott, S.D. Pelham, D.J. Reuter

Fate of nitrogen fertilizer applied on two main arables crops, winter wheat (*Triticum aestivum*) and sugar beet (*Beta vulgaris*) in the loam region of Belgium 367
J.P. Destain, E. Francois, J. Guiot, J.P. Goffart, J.P. Vandergeten, B. Bodson

Use of urease inhibitors to reduce ammonia loss following application of urea to flooded rice fields 371
J.R. Freney, D.G. Keerthisinghe, P. Chaiwanakupt, S. Phongpan

A comparison of the effects of subsoiling on plant uptake and leaching losses of sulphur and nitrogen from a simulated urine patch 375
R.G. McLaren, K.C. Cameron, P.M. Fraser

Modelling of sulfur oxidation from elemental sulfur 379
G.J. Blair, R.D.B. Lefroy, M. Dana, G.C. Anderson

Sulfur soil testing 383
G.J. Blair, R.D.B. Lefroy, N. Chinoim, G.C. Anderson

Effects of sowing time and plant age on critical nitrogen concentrations in canola (*Brassica napus* L.) 387
P.J. Hocking

Nitrogen and yield potential of irrigated rice 391
M.J. Kropff, K.G. Cassman, H.H. van Laar, S. Peng

Effect of nitrogen (NH_4 NO_3) supply on absorption of ammonium and nitrate by conventional and hybrid rice during reproductive growth 395
L. Ancheng, X. Jianming, Y. Xiaoe

Changes in soil organic matter with cropping as measured by organic carbon fractions and ^{13}C natural isotope abundance 399
R.D.B. Lefroy, G.J. Blair, W.M. Strong

Release of nonexchangeable potassium from different size fractions of two highly K-fertilized soils in the rhizosphere of rape (*Brassica napus* cv Drakkar) 403
J.F. Niebes, J.E. Dufey, B. Jaillard, P. Hinsinger

Distribution of potassium in the soil profile of a sandplain soil under pasture species 407
N.K. Edwards

Potassium, calcium and magnesium antagonism in clones of *Populus trichocarpa* 411
B. Diem, D.L. Godbold

Supplemental calcium does not improve growth of salt-stressed *Brassicas* 415
C. Schmidt, T. He, G.R. Cramer

Magnesium deficiency in expanding leaves of *Phaseolus vulgaris*: Gas exchange and nutrient concentrations 419
E.S. Fischer, E. Bremer

The effect of potassium application on leaf water relations characteristics of field grown barley plants (*Hordeum distichum* L.) 423
C.R. Jensen, M.N. Andersen, R. Lösch

Potassium deficiency causes injuries to *Picea pungens glauca* in nurseries 427
D. Alt, S. Jacob, N. Rau, R. Wirth

Analysis of the genotypic variation in radiocaesium uptake from soil 431
E. Smolders, L. Sweeck, J. Buysse, K. Van Den Brande, R. Merckx

Zinc-binding peptides as a function of Zn and S in soybeans 435
R.L.F. Fontes, F.R. Cox

Effect of pH on Mn absorption by barley genotypes in a chelate-buffered nutrient solution 437
C. Huang, M.J. Webb, R.D. Graham

Effect of bicarbonate and root zone temperature on uptake of Zn, Fe, Mn and Cu by different rice cultivars (*Oryza sativa* L.) grown in calcareous soil 441
X. Yang, V. Römheld, H. Marschner

Evaluation of strategy I mechanisms in iron efficient and inefficient maize cultivars 445
N. von Wirén, V. Römheld, H. Marschner

Effects of seed manganese concentration on lupin emergence 449
J. Crosbie, N. Longnecker, F. Davies, A. Robson

Development of an ELISA for estimation of the copper nutritional status of wheat and cotton 453
N.R. Rao, J.D. Ownby

Copper supply and the leaf emergence rate of spring wheat 457
N. Longnecker, J. Slater, A. Robson

Novel nutrient solutions for zinc nutrition research: Buffering free $zinc^{2+}$ with synthetic chelators and P with hydroxyapatite 461
D.R. Parker

Inhibition of mitochondrial electron transport is the prime cause behind proline accumulation during mineral deficiency in *Oryza sativa* 465
P.P. Saradhi, Alia, B. Vani

Growth and nutrition of small *Betula pendula* plants at different relative addition rates of iron, manganese and zinc 469
A. Göransson, A.J.S. McDonald

Genotypical differences in responses to iron deficiency between sensitive and resistant cultivars of chickpea (*Cicer arietinum*) 473
Y. Ohwaki, K. Sugahara

Iron, zinc and manganese nutrition of wetland rice (*Oryza sativa* L.) on a gypsum amended sodic soil 477
A. Swarup

The effect of aluminium on the distribution of calcium, magnesium and phosphorus in mycorrhizal and non-mycorrhizal seedlings of *Eucalyptus rudis*: A cryo-microanalytical study 481
L.M. Egerton-Warburton, J. Kuo, B.J. Griffin, B.B. Lamont

Interactions between aluminium, magnesium and calcium with different mono-cotyledonous and dicotyledonous plant species 485
W.G. Keltjens, K. Tan

Effect of various metal ions on growth of two wheat lines known to differ in aluminium tolerance 489
D.M. Wheeler, I.L. Power, D.C. Edmeades

Screening sorghum for tolerance to excess manganese in solution culture 493
W.G. Mgema, R.B. Clark

Proline in relation to free radical production in seedlings of *Brassica juncea* raised under sodium chloride stress 497
Alia, P.P. Saradhi, P. Mohanty

A multichannel pH controller for solution culture systems 501
M.J. Webb

Effect of exchangeable aluminium on the reduction of potato scab 505
N. Mizuno, H. Yoshida

Physiological responses of lupin roots to high pH 509
C. Tang, A.D. Robson, N.E. Longnecker, H. Greenway

Variation in the growth of lupin species and genotypes on alkaline soil 513
C. Tang, B.J. Buirchell, N.E. Longnecker, A.D. Robson

High pH in the nutrient solution impairs water uptake in *Lupinus angustifolius* L. 517
C. Tang, B.T. Cobley, S. Mokhtara, C.E. Wilson, H. Greenway

Screening species and cultivars for their tolerance to acidic soil conditions 521
S.M. Ring, R.P. Fisher, G.J. Poile, K.R. Helyar, M.K. Conyers, S.G. Morris

The binding of zinc in root cells of crop plants by phytic acid 525
R.F.M. Van Steveninck, A. Babare, D.R. Fernando, M.E. Van Steveninck

What is the significance of herbicide-nutrient interactions on wheat? 529
L.D. Osborne, A.D. Robson

Production of SH compounds in higher plants of different tolerance to Cd **533**
H. Obata, M. Umebayashi

Author index **537**

Plant and Soil, Volumes 155&156, Section Editor: A.C. Borstlap.
